FRONTEND WEB DEVELOPER | WEB SPECIALIST

PROFESSIONAL SUMMARY

Computer Science graduate and freelance web developer who builds responsive, accessible, user-focused websites and web applications from concept through deployment. Combines hands-on React and JavaScript development with practical web-specialist strengths in content structure, SEO, accessibility, API integrations, testing, branding, and client collaboration. Experienced modernizing legacy business websites, creating reusable components and data structures, and delivering production-ready sites that are easier to use and maintain.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React, Tailwind CSS, Responsive Design

Web Development: Component-Based Architecture, State Management, Reusable Components, DOM Manipulation, REST APIs, API Integration

Web Operations: SEO, Accessibility (a11y), Manual Testing, Cross-Browser Testing, UI/UX Principles, Information Architecture

Tools & Services: Git, GitHub, Vercel, GitHub Pages, Sanity CMS, Resend, EmailJS, VS Code, Figma

PROFESSIONAL EXPERIENCE

Freelance Web Developer | All Construction Services LLC

Jun 2026 – Aug 2026

- Modernized a legacy construction website into a responsive React application, translating client requirements into a production-ready web experience.
- Architected reusable data modules for core business information, improving maintainability and separating content from layout code.
- Implemented responsive design, semantic HTML, accessibility, and technical SEO best practices to strengthen cross-device usability and search discoverability.
- Integrated serverless contact forms with Resend and conducted manual user-flow testing to validate reliable submission and error handling.
- Created a refreshed brand identity including a custom logo, visual style, and unified color palette; deployed the production build to Vercel.

Freelance Web Developer | Second Run Logistics LLC

Aug 2023 – Sep 2025

- Built a responsive customer-facing logistics website from scratch using React, managing the experience from initial layout through release.
- Developed modular, reusable UI components with a focus on accessibility, responsive design, and SEO.
- Created a custom corporate logo and tailored visual system based on client requirements.
- Integrated EmailJS communication workflows, performed manual integration testing, and collaborated with the owner on post-launch updates and feature iterations.

SELECTED PROJECTS

Pie-Zano's Pizza | Website Modernization

- Redesigned a local restaurant website as a modern, mobile-first React application with an optimized dark-themed interface.
- Integrated Sanity CMS for owner-managed menu and promotion content; restructured information architecture for clearer navigation.
- Implemented Resend contact functionality and deployed through Vercel.

Bless Bunny Rabbitry | Website Modernization

- Overhauled a content-heavy website with React, resolving mobile responsiveness and inconsistent layout issues.
- Simplified information hierarchy and transformed dense business information into a more intuitive navigation experience.
- Designed a scalable architecture for planned Sanity CMS integration.

ADDITIONAL FRONTEND PROJECTS

Movie Watchlist App — React, JavaScript, REST API: State-driven media catalog with custom hooks, debounced search, localStorage persistence, filters, and loading/empty/error states.

Crypto Price Tracker — React, JavaScript, REST API: Interactive dashboard using CoinGecko API with asynchronous data fetching, currency filters, loading states, and dynamic data tables.

EDUCATION & CERTIFICATIONS

B.S. Computer Science — Web/Mobile Development & Software Engineering

University of North Carolina at Charlotte

Dean's List • S-STEM Scholars Scholarship

Certifications

Responsive Web Design • JavaScript Algorithms and Data Structures • Frontend Development Libraries

freeCodeCamp
